

TOSHIBA

International Imaging Seminar 2019

Toshiba Teli's prospect of high resolution camera

Visual Component Development Div.

Toshiba Teli Corporation

December 5th 2019

Contents

01 Market trend

02 Task

03 Proposal by Toshiba Teli

01

Market trend

~ What's the requirement for higher resolution in machine vision camera? ~

Advantage of higher resolution

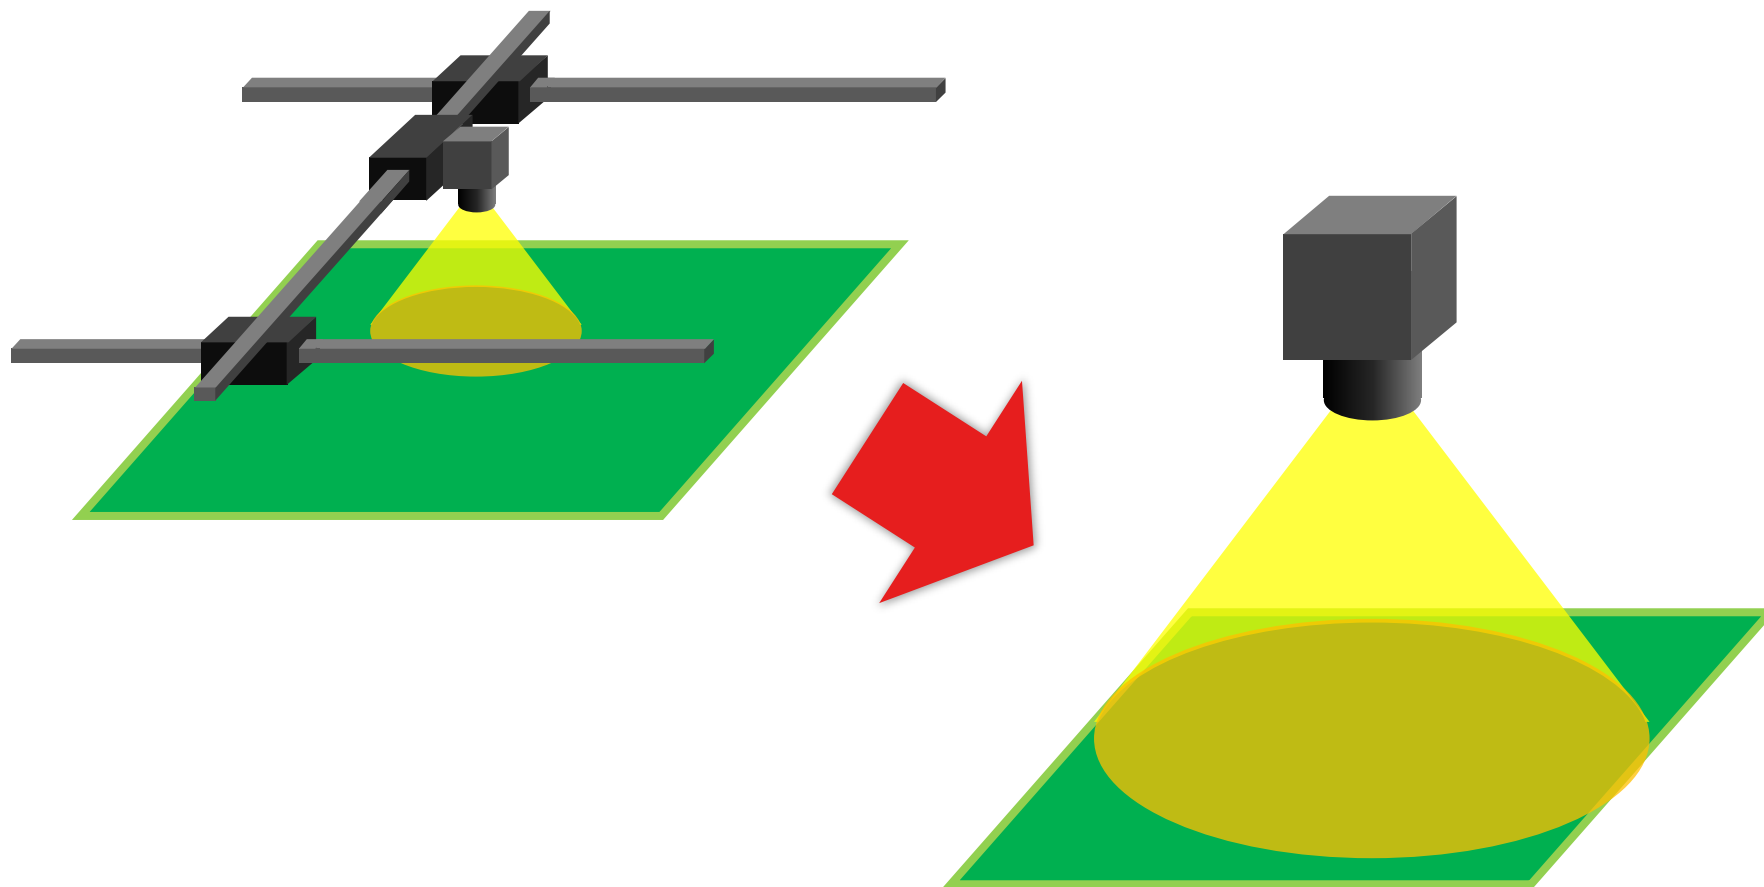

What's advantage of higher resolution?

Advantage of higher resolution

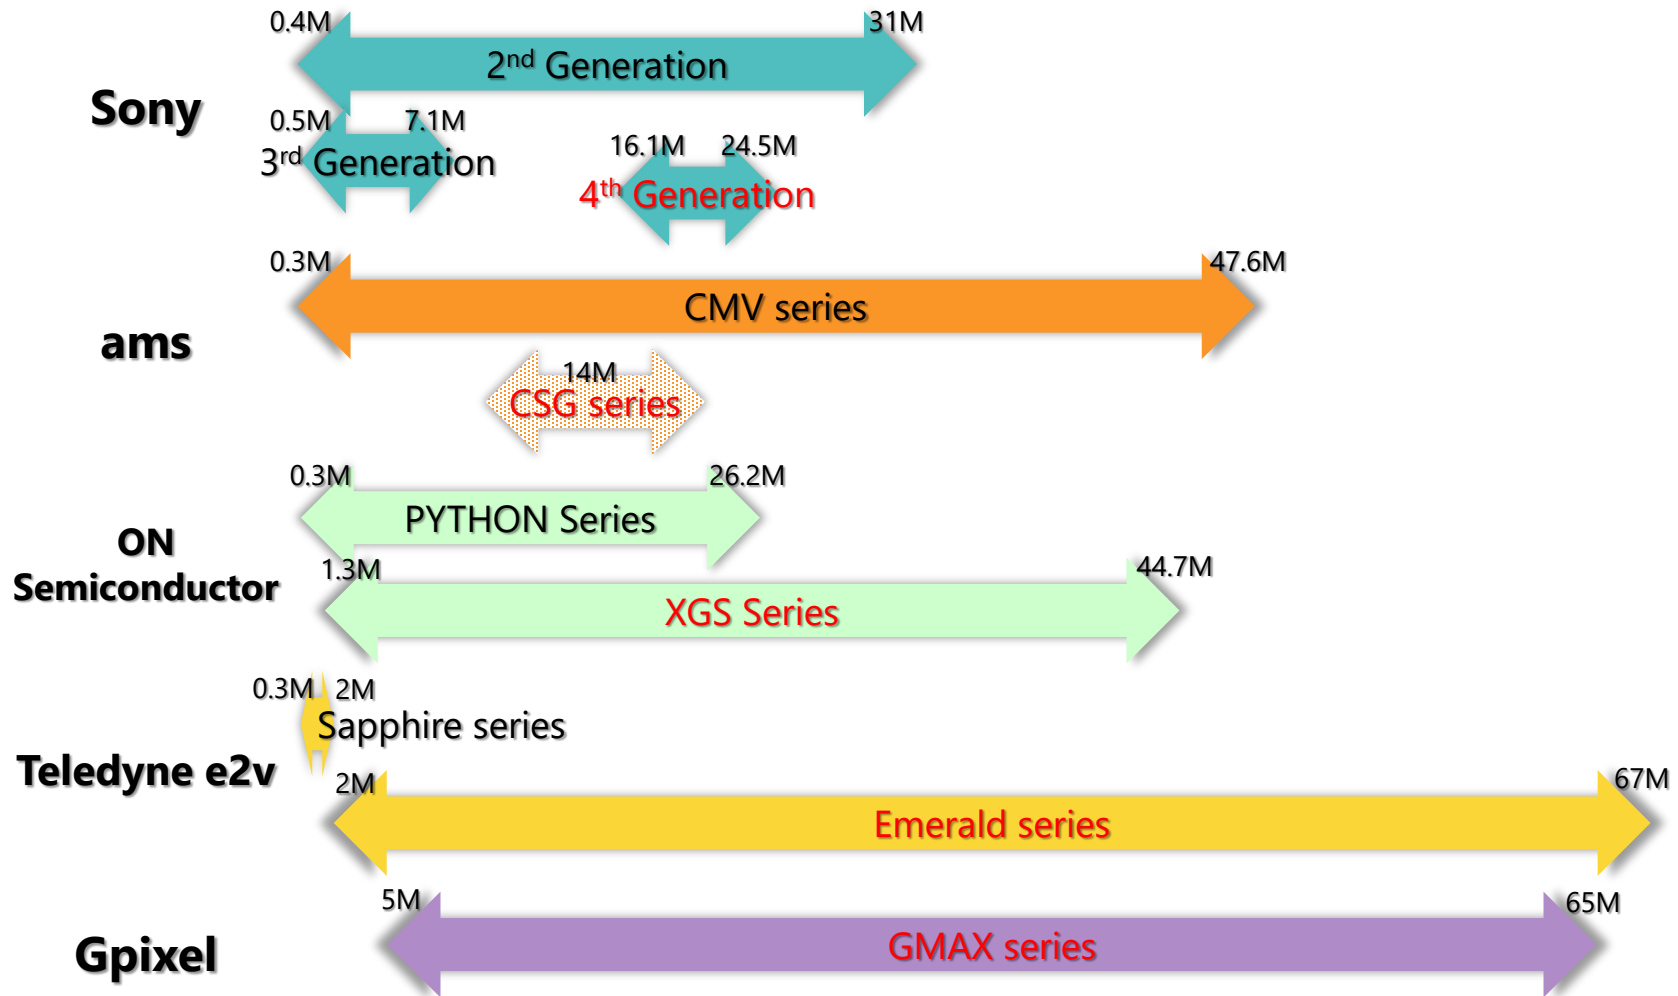

Integration of multiple cameras to one

Advantage of higher resolution

Location of camera can be fixed

Sensor trend

High resolution sensors of over 20MP are released

Trend of machine vision camera

Higher resolution is proceeding even in small size camera

02

Task

~ What's the task of higher resolution? ~

What's the task in higher resolution?

Task – Optical size

C mount cannot support most of high resolution sensors

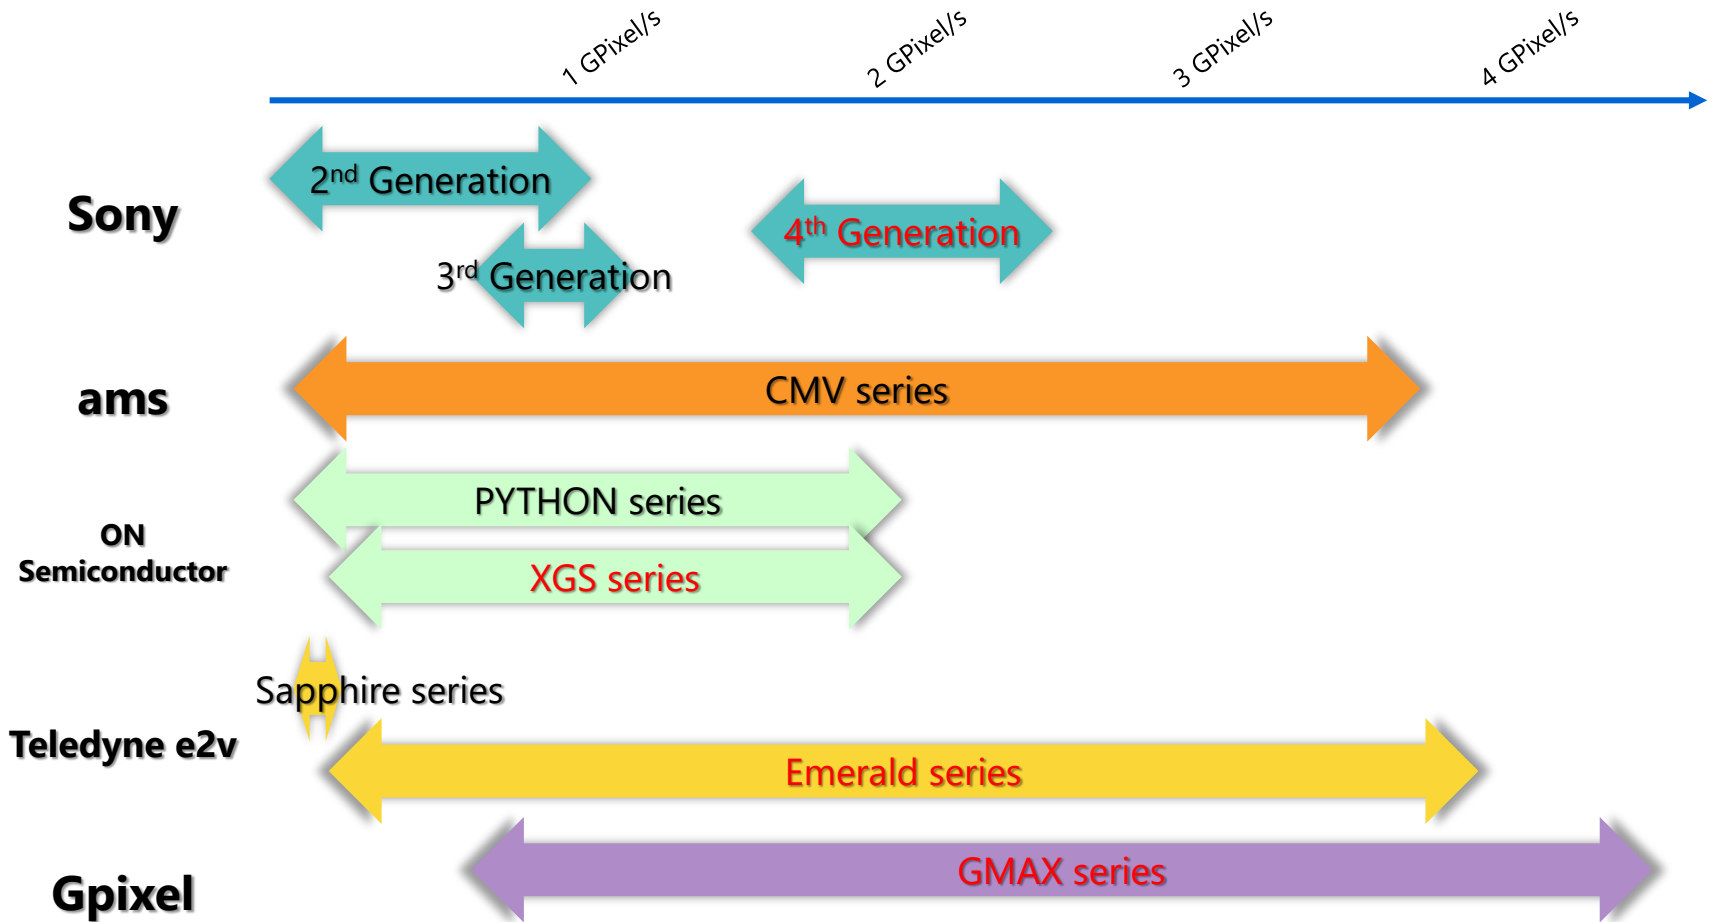

Task – Optical size

No standard size for over C mount

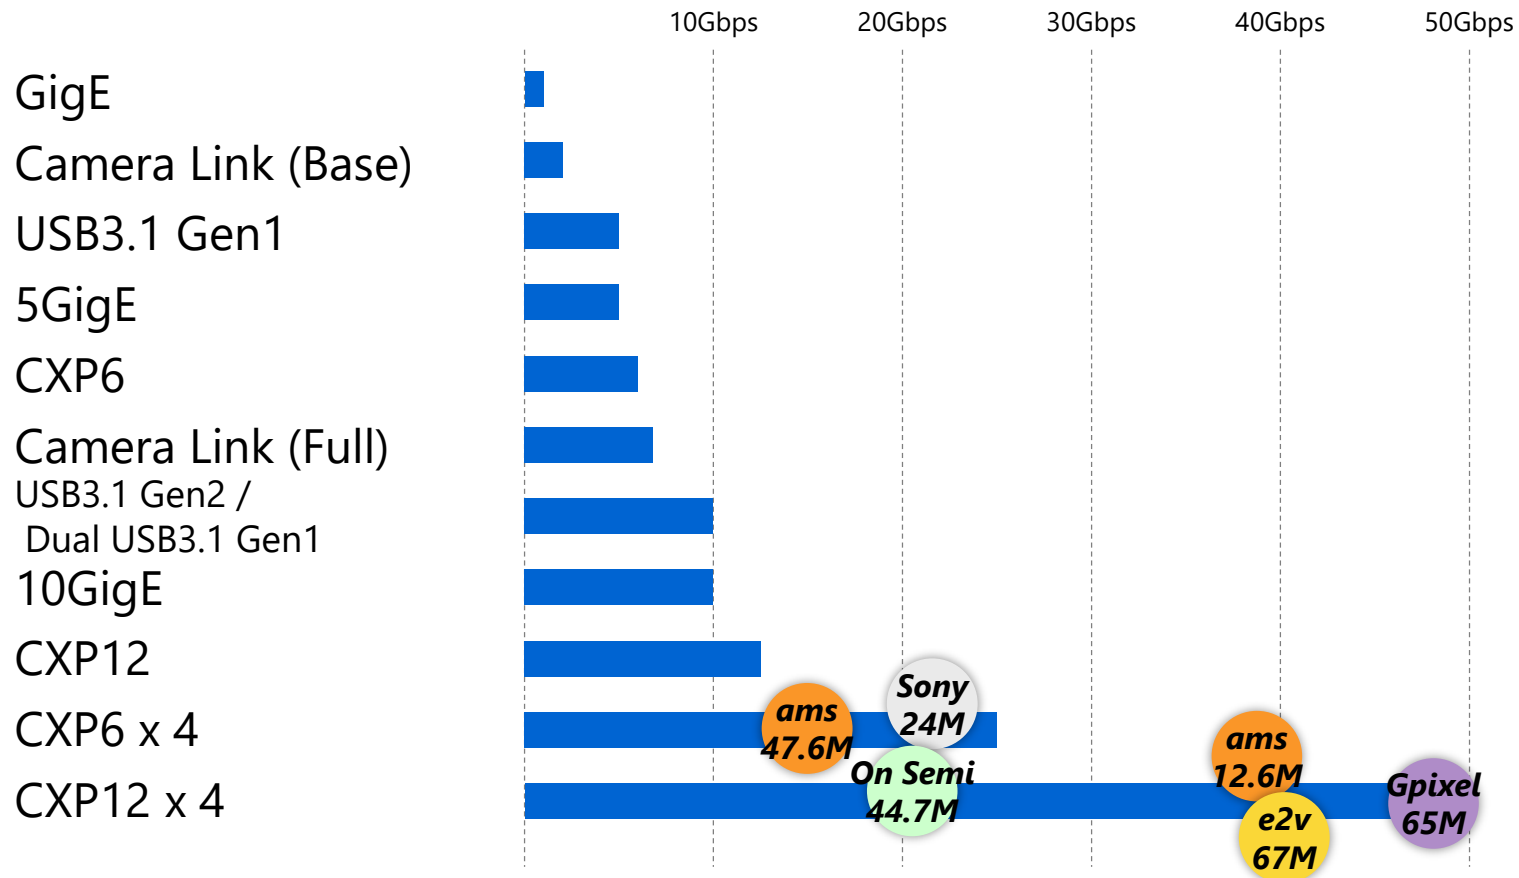

Task – Interface

Higher resolution and speeding up are progressing simultaneously

Task – Interface

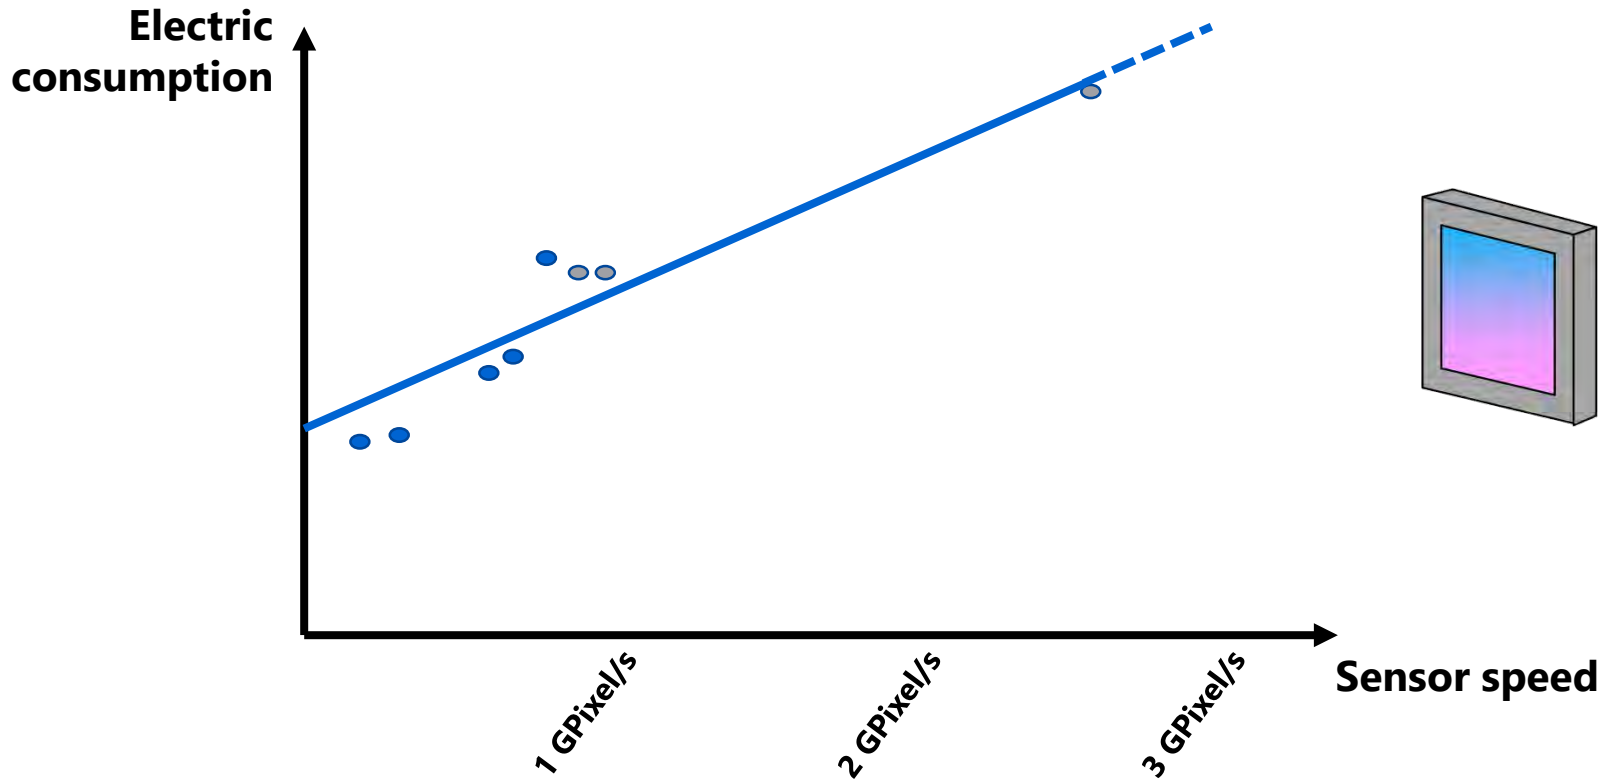

* Above is not a transfer bandwidth of image data but that of interface.

Only CoaXPress allows maximum performance of sensor

Electric consumption of image sensor alone

Electric consumption is proportional to Sensor speed

Task - Heat

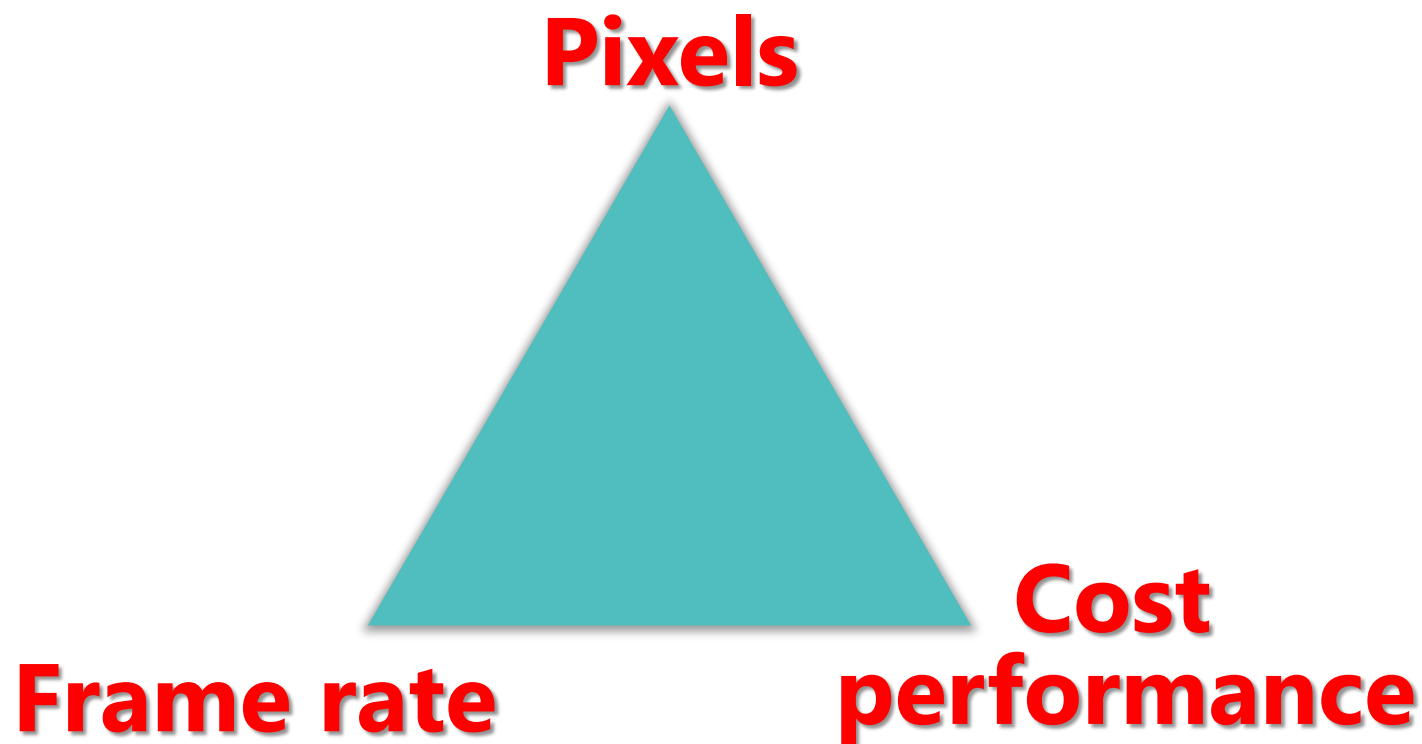

**Heat elimination is the task of
image sensor and Interface**

03

Proposal by Toshiba Teli

~ Toshiba Teli's optimal solution ~

How to balance?

4th generation Pregius S camera

Bandwidth
5G

Specifications

- Imager Sony IMX530
- Resolution 24M (5,320x4,600)
- Pixel Size 2.74μm x 2.74μm
- Opt. Format 1.2 type
- Frame Rate TBD
- Interface USB3.1 Gen1

Cost performance is important

DDU1207MG/MCG/MCF

Dual
Bandwidth
10_G

Specifications

- Imager Sony IMX253
- Resolution 12M (4,096x3,000)
- Pixel Size 3.45 μ m x 3.45 μ m
- Opt. Format 1.1 type
- Frame Rate 60 fps
- Interface USB3.1 Gen1 2-Lane

Pioneer of Dual USB3 interface

New Dual USB3

Dual
Bandwidth
10_G

Specifications

- Imager TBD
- Resolution 16M (TBD)
- Pixel Size TBD
- Opt. Format TBD
- Frame Rate TBD
- Interface USB3.1 Gen1 2-Lane

Both of Frame rate and Cost performance

120M Pixel camera

Bandwidth
25G

Specifications

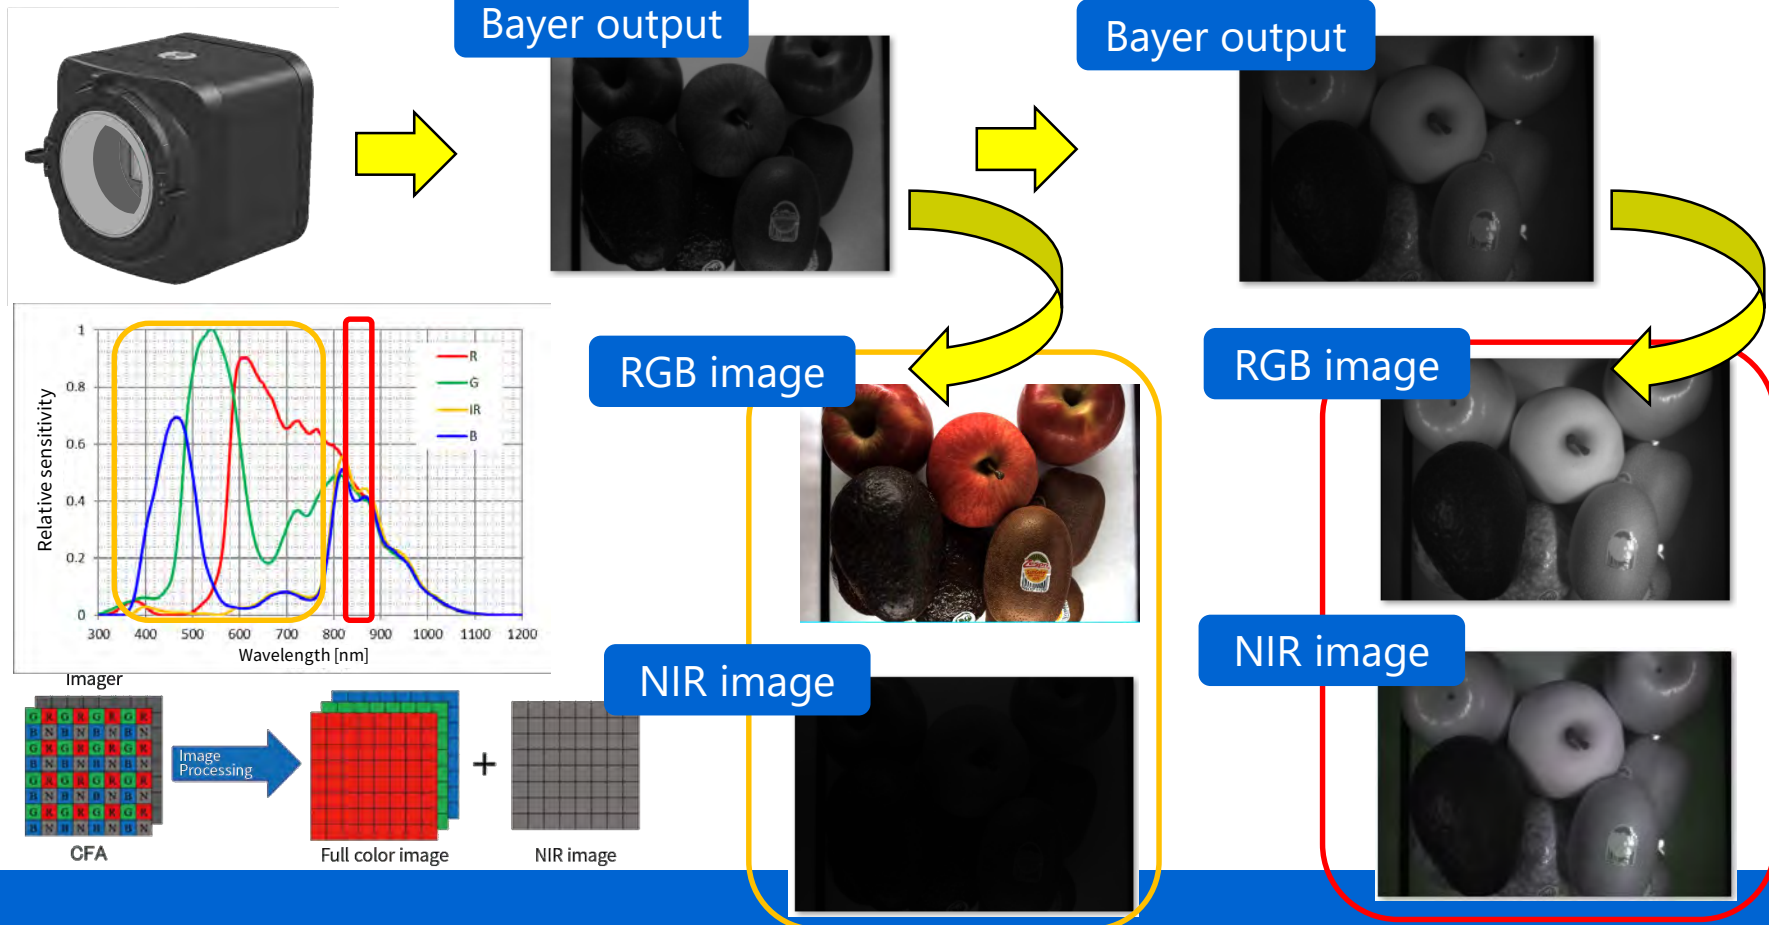

- Imager Canon 120M
- Resolution 120M (13,280x9,167)
- Pixel Size 2.2 μ m x 2.2 μ m
- Opt. Format APS-H
- Frame Rate 9.39fps
- Interface CXP6 4-Lane

Concentrate on Pixels

Proposal by Toshiba Teli

White LED Irradiation

NIR860nm LED Irradiation

**Demonstrating a camera equipped with
RGB+NIR filter sensor**

CoaXPress 2.0 camera

Bandwidth
50G

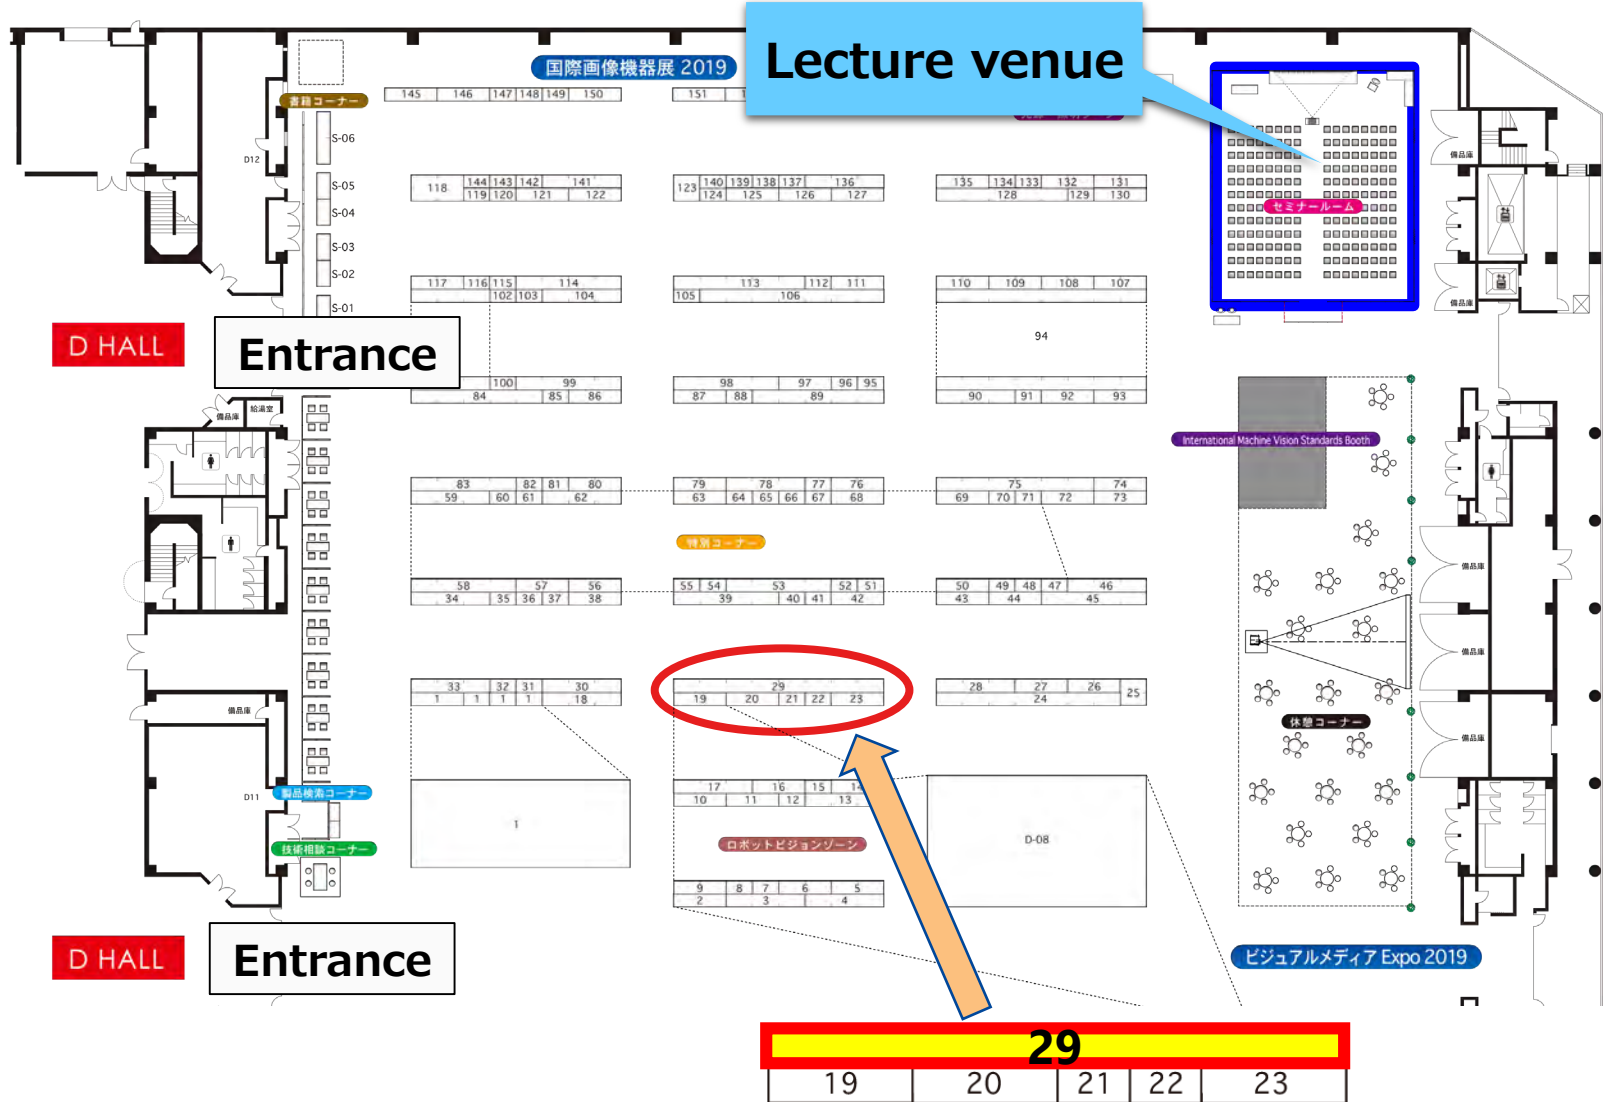

Specifications

- Imager Gpixel GMAX6532
- Resolution 65M (4,096x3,000)
- Pixel Size 3.2µm x 3.2µm
- Opt. Format APS-H +
- Frame Rate 76fps
- Interface CXP12 4-Lane

Both of Pixels and Frame rate
